Search Notes

Kurt,

Attached is the completed search for the portable item with window for flashcards. I searched the inventor in the patent literature and the results are attached. I searched extensively bibliographic and full-text databases as well as on the Internet. I found several items that I think might be of help to you – they are marked with blue flags. But please look over all the results as there may be other items of interest. I have attached the search strategies used for the searches performed.

If you have a moment, please fill out the attached STIC Feedback Form. If there is anything I can do to refine or revise this search, please let me know.

Sincerely,
Ethel Leslie

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
DE 20215465	U1		3	A45C-013/08	

Abstract (Basic): DE 20215465 U1

NOVELTY - The material of the **bag** is provided with a horizontal slot at least at the front. A transparent **sheet** is sewn to the area around the slot either only to the outer surface of the **bag** or to both, the inner and the outer surface. A **sheet** containing a company logo, a slogan or any other picture or text can be inserted into the pocket created at the outer surface through the slot from inside the **bag** .

USE - The **transparent pocket** for the insertion of a **sheet** with a company logo or slogan can be used for a **bag** .

ADVANTAGE - The logo can be added after the **bag** is assembled. The same design of **bag** can be provided with different pictures or texts. The **sheets** can be easily exchanged if required.

Abstract (Basic): DE 20215466 U1

NOVELTY - The **bag** can be of any suitable design or material and is provided with a **transparent pocket** or layer at the front. The pocket or layer is fixed to the **bag** along three of its sides, while one side is left open for the insertion of a **sheet** containing a logo, a slogan, or any other printed information or decorative pattern.

USE - The design can be used for a **handbag** or shopping **bag**.

ADVANTAGE - The information **sheet** can be easily added to or removed from an already existing **bag**. The appearance of the item can be quickly changed in relation to its use.

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
US 4685570	A		6		

Abstract (Basic): US 4685570 A

A **sheet** of plastics material folded at the middle forms a pair of side panels, with the juncture edge between the panels lowermost and the panels extending upwardly. The ends and top are open, and the panels can be opened to a flat position. Plastics pocket pieces are secured to the panels, forming large pockets between themselves and the panels. Certain of those pocket pieces have additional pocket pieces secured to form additional and smaller pockets.

All of the plastics pieces are clear and all of the contents of the pockets can be seen from either side of the folded tote either in open or folded position. Plastics carrying handles are secured to the free edges of the panels. A detachable shoulder strap is also provided. Reinforcing fabric strips are secured to the juncture edge and other edges.

ABSTRACT

PROBLEM TO BE SOLVED: To provide a card **case** which can effective avoid the contact between the other face plate and a card by a simple constitution when the card to be housed in a housing section formed in the card **case** is moved for the insertion/removal.

SOLUTION: One face plate 1 has a **window** 1c by which the **card** Z can be moved in the insertion/removal direction P by pressing the card Z with a finger by exposing a part of the card Z being held. At the same time, the other face plate 2 has a curved internal surface 2a2 which avoids the contact with the card Z when the card Z is pressed with the finger.

ABSTRACT

PROBLEM TO BE SOLVED: To disclose the structure of a **briefcase**, which requires no labor for separation at disposal, can be utilized as recycled resources and, at the same time, is excellent in easiness in use.

SOLUTION: In this **briefcase**, a paper-made **case** body formed of a front side face and a rear side face is formed through a center folding line and a **window** with a transparent or semitransparent paper **sheet** stuck thereto is provided at least on a part of the front side face. As the main body and the **sheet** of the **window** are made of paper, they can be utilized as recycled resources requiring no conventional labor for separation of the **sheet** of the **window** and causing no trouble at disposal. In addition, as the paper sheet, for example, glassine paper is

adopted. Further, a folding margin provided on the rear side face of the one side continuous with the center folding line is stuck to the front of the front side face. As the remaining two sides are left open for inserting documents therethrough, the folding margin does not interfere with the insertion of the documents and the whole rear side face can be adopted as a printing area.

ABSTRACT

PROBLEM TO BE SOLVED: To provide a card **case** with which cards can be reliably pushed out one by one constantly when needed.

SOLUTION: The **card case** has a **window** on at least one of surfaces, the window being a through hole. The hole has a sliding member made of a rubber elastic body so that it can be fitted in the hole and can move in the hole.

ABSTRACT

PROBLEM TO BE SOLVED: To provide a merchandise protecting function for a **bag** to be carried in one's hand and a manufacturing method for continuously manufacturing the **bags** .

SOLUTION: A tote **bag** 1 made of plastic films comprises a front sheet 2 and back sheet 3. A part of the front sheet 2 at the opening 7 of the **bag**

1 is folded inside into a band shape, and the back sheet 3 is folded in a band shape in such a way as to cover the front **sheet** 2. A **window** 4 for carrying the **bag** 1 in one's hand is opened at the location of the folded parts 21/31.

ABSTRACT

PROBLEM TO BE SOLVED: To provide a card **case** for a user to take in/out a card easily.

SOLUTION: This card **case** consists of a base sheet 1 and a cover sheet 2 attached to the base sheet 1 to form a pocket part 4 on the base sheet 1. At least one of the base **sheet** 1 or the cover **sheet** 2 has a **window** 8 in the size large enough for a user to insert a finger and a bulge 6 bulging inward in the pocket part 4.

ABSTRACT

PROBLEM TO BE SOLVED: To smoothly perform take-in and take-out and to prevent housed cards from being discharged other than the take-in and take-out.

SOLUTION: On the front side **sheet** 1 of a housing pocket, the cut **window** 3 of an oblong hole for making a finger tip directly touch the housed cards is provided. Then, an easy slipping material 5 whose width is wider than

the width of the cut window 3 for 10-25 mm and whose dynamic frictional coefficient does not exceed 1/2 of the surface of an opposite side sheet (back side) 2 is joined to the part facing the cut window 3 of the opposite side sheet surface of the pocket including a pocket mouth part. At a pocket mouth 4, it is desirable that the opposite side of the pocket is 3-20 mm longer than a front side. Also, as the easy slipping material, a polytetrafluoroethylene film or satin into which polytetrafluoroethylene fibers are woven in warp is suitable.

ABSTRACT

PROBLEM TO BE SOLVED: To provide a portable terminal case which has a function for recognizing the function of a depression key-type switch by a sense of touch and can securely operate a portable terminal even when it is used by a blind person or at a dark place.

SOLUTION: A display sheet 12 which is arranged in a position corresponding to the position of the depression key-type switch of the portable terminal stored in the storage part 17 of the portable terminal case 11 and has projecting/ recessed parts 14 constituted to recognize the function of the depression key-type switch by the sense of touch is installed on the display sheet window 18 of the portable terminal case 11. Thus, the user of the portable terminal can recognize the functions of respective depression keys by the sense of touch even without looking at the display of the depression key-type switch.

ABSTRACT

PROBLEM TO BE SOLVED: To provide a cellular phone cover for eliminating electromagnetic waves emitted from the cellular phone by disposing an electromagnetic waves shielding material made of a carbon material, a strong magnetic substance or a good conductor on an entire surface of a cover material covering an entire surface of the cellular phone.

SOLUTION: An electromagnetic waves shielding material 15 is a felt-like mat of carbonic fibers, of which thickness between abouts 0.4 mm to 0.5 mm is used. The electromagnetic waves shielding material 15 is provided sandwiched between an outer texture 14 and inner texture 16 to cover the entire area of a cover main body section, a flap section and a band section 22 of the cell phone. A transparent **window** 11 is a flexible transparent **sheet** provided with an electromagnetic waves shielding material 23. The electromagnetic screening material 23 is formed by positioning a lot of transparent sections for reading-out 24 to be a metal mesh shape so as to confirm each operation button on a push button operation surface 4 of the contained cell phone 2 from outside. The electromagnetic waves shielding material 23 is printed with a paint of carbon black as a main paint including a binder, in this **case**, nickel, zinc, copper or the like may be mixed **case** by **case**.

JAPIO CLASS: 31.2 (PACKAGING -- Containers)

ABSTRACT

PROBLEM TO BE SOLVED: To make it possible to see whether a spectacles- **case** contains a pair of spectacles inside it or not at one glance from the outside without opening the lid by providing a through hole in the lid section of a main body and fitting it with a transparent sheet which covers the entire through hole.

SOLUTION: A through hole 3 (window) is cut through a part of the lid section 2 of a main body 1, and by covering the entire through hole 3 (**window**) with a transparent **sheet** 4, the inside of a spectacles- **case** is made visible from the outside without touching it by hand. When the **case** is in use, it is possible to see whether a pair of spectacles are inside it or not at one glance by looking the inside through the through hole 3 (window). Using this spectacle- **case**, therefore, eliminates the possibility of going out in a rush taking along the **case** alone and later

feeling vexed to find that it does not contain the spectacles. In addition, it is possible to increase the pleasure of the user by widening the range of designs for the spectacles- **case** through adopting various shapes and sizes for the window.

ABSTRACT

PURPOSE: To enhance practical usability and decorative property of a portable article such as an electronic **pocketbook** .

CONSTITUTION: One side of a cover body 10 for covering a front face of an electronic **pocketbook** main body 1 is fitted to a main body side by means of a hinge 14, a window part 13 is opened in the cover body 10, a pair of holding tools 11 for a **card** 12 are provided on both sides of the **window** part 13 on the inner side of the cover body 10, a pattern of the card 12 held by the holding tools 11 for the **card** 12 is visible through the **window** part 13, and the **card** holding tools 11 are capable of replacing the card 12 and the like. Since the card 12 is held at edge parts thereof, the rear face of the card 12 can be viewed even from the inside of the cover body 10, the card can be inserted while being turned inside out, and two cards can be overlapped on each other to exhibit both an obverse and reverse. In the **case** of an article without a cover body, a similar effect can be obtained by providing a simple board equipped with a window part and holding tools.

ABSTRACT

PURPOSE: To enable the recovery of a card and reception of a portable **case** only with one hand operation so that one can pass through a wicket while carrying a baggage by providing a semicircular recovery port having flexibility in the back surface of the portable **case**.

CONSTITUTION: A card sandwiched between a groove-like rear surface cover 2 and front surface cover 4 is pushed up by a thumb 6 from a window frame opening 3 provided in the front surface cover 4 of a portable **case** 1. The card 5 is ejected from an upper ejection port 7 and inserted into an inserting port of a predetermined examining machine by the action of the thumb 6. In the recovery of the card, the portable **case** 1 is bent near a rear surface recovery port 9 by the thumb 6 and medical finger 8, and the card 5 finished with the examination is inserted into the rear surface recovery port 9 wide opened from a card outlet of the automatic examining machine 10. The **card** 5 is pushed up by the thumb 6 from the **window** frame opening 4 provided in the front surface cover 4 until the card 5 passes completely through the rear surface recovery port 9, and thereafter the card 5 is completely received in the portable **case** 1 by drawing back

the card 5 with the thumb.

Abstract (Basic): WO 9966476 A1

NOVELTY - A card holder is coupled to a **case** for holding an information bearing card having an academic problem and a coded answer. The **case** has an optical image decoding display **window** for viewing of the coded region of the **card** placed in the **card** holder. The display **window** has a movable optical writing screen (65) that can be moved to predetermined screen positions for covering or uncovering of the window.

USE - Used for holding and displaying information bearing card e.g. flash card. Applicable for mathematical learning of child.

ADVANTAGE - Improves utilization ability of user regarding the flash cards. Enables convenient provision of response or answer on writing screen by user. Enables automatic erasure of information content on writing screen whenever writing screen is positioned to insert new card, hence confusion of user is reduced. Prevents user from knowing the answer regarding a predetermined academic problem before the user formulates his or her own answer. Facilitates accurate feedback since user's answer and decoded response can be viewed in close proximity to one another. Utilization of flash cards can be enjoyed by user.

DESCRIPTION OF DRAWING(S) - The figure shows the top view of a learning device in a writing screen position in which the decoding display window is not covered.

JP 11266917	A		3	A45C-011/18	

Abstract (Basic): JP 11266917 A

NOVELTY - Smooth sliding material (5) of width 10-25 mm is formed

on the back side **sheet** opposing the **window** formation area of the front side **sheet** . The coefficient of dynamic friction of sliding sheet is less than half the coefficient of dynamic friction of the back sheet.

DETAILED DESCRIPTION - Front side **sheet** (1) having a **window** (3) is attached to the back side **sheet** (2), to form a pocket for receiving season tickets through the pocket opening (4).

USE - For storing cards, and also season tickets in **handbag** , clothes.

ADVANTAGE - Provision of sliding sheet enables smooth insertion and removal of season ticket. Provision of cutout window assists in easy removal of season ticket. DESCRIPTION OF DRAWING(S) - The figure shows front elevation of the pocket. (1) Front side **sheet** ; (2) Back side **sheet** ; (3) **Window** ; (4) Pocket opening; (5) Smooth sliding material.

Abstract (Basic): US 5277587 A

The learning toy uses cards which display, on one face both a problem or question and an answer or solution. The answer is coded or unreadable until such time as it is viewed through a viewing window

incorporating a deciphering device. The learning toy also pref. incorporates a holder which, after the individual card is reviewed by the child or student, receives the card in a manner which positions the coded answer for viewing through the deciphering viewing window. At the same time, the problem remains exposed for simultaneous viewing with the now exposed answer. The holder is in the nature of a storage **case** for the storing of multiple cards with the cards selectively withdrawn for individual use.

The holder is also partic. adapted for use as a stand or free standing display device. The viewing window removably mounts to the holder and combines therewith in defining a compartment for reception of the single **card** to be viewed. Several interchangeable viewing **windows** can be used, with use of a particular viewing window. In particular the deciphering opening or openings are determined by the nature of the cards and the coded answers.

USE/ADVANTAGE - Deciphered answers can appear in any appropriate form, e.g. for maths problems, or words or letters for word problems, or any combinations. Presents challenge more readily accepted by child.

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
US 4664633	A		8		

Abstract (Basic): US 4664633 A

A stencil **case** and cards are provided for use with the stencil **case**. The stencil **case** has a front panel and can receive a card such that the card lies adjacently behind the panel. The panel has a first surface region containing a window through which a user can view the adjacently lying part of a card, a second surface region containing a stencil, and a third surface region bearing indicia associated with what is seen through the **window** when any one of the **cards** is received adjacently behind the panel.

Each card has a front face and a reverse face, the front face

having a first region containing a picture or indicia that will be visible through the **window** when the **card** lies adjacently behind the front panel. Each **card** further contains a second region for receiving a stencilled marking through the stencil of the front panel. The combination is intended to be used as an educational aid.

US 20040188299	A1		9	A45F-005/12	

Abstract (Basic): US 20040188299 A1

NOVELTY - The **bag** (10) has an upper section (30) with a mounting pocket that opens downward and engages a chair`s backrest. A lower section (40) has two compartments opening upward to store books and school supplies in an organized manner. A pocket (6) at an exterior front face of the section (40), holds additional school supplies. A transparent plastic **window** frame (80) is secured to another pocket (70) for inserting a photograph.

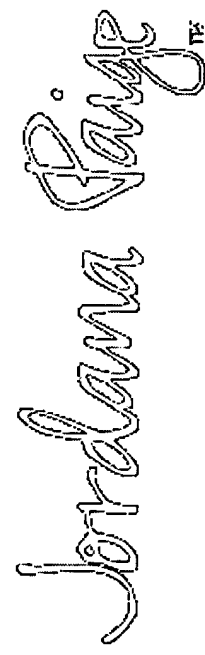

USE - Used for mounting on a backrest of a chair of a preschool or kindergarten school child for storing a book and a school supply e.g. pencil, pen, crayon, scissor.

ADVANTAGE - The transparent plastic **window** frame is secured to another pocket for inserting the photograph, and hence allows insertion of an identification **card** or advertising **card**. The lower section of the **bag** has two compartments to store the books and school supplies in the organized manner, thereby allowing the books and school supplies to be arranged without a clutter and difficulty of retrieval of the contents.

DESCRIPTION OF DRAWING(S) - DESCRIPTION OF DRAWING - The drawing shows a front elevational view of a book **bag** for mounting on a chair.

ABSTRACT: Burch reviews several soft bags, hard cases, and racks for all-terrain vehicles, including the Cabela ATV Dry Box, the Kawasaki Tank Bag, and the Plano Rear-Mount ATV Box.

TEXT:

How to carry more on your ATV.

Not only can ATVs get you to your hunting spot, but, with a wide variety of soft bags, hard cases and racks, you can safely tote all your gear as well.

The Kolpin soft bags from Cabela's are designed to attach at various specific points on your ATV.

"In addition to toting hunters to their hunting sites, ATVs are often used to transport gear as well. One of the fastest-growing segments of the ATV market is the myriad soft bags, hard cases and aftermarket racks that can be added to increase the versatility of such vehicles.

Soft Bags

Many ATV manufacturers offer their own versions of accessory bags and racks. These items are often sized or designed to fit specific ATV models. For instance, Kawasaki has rack bags for its Prairie models. These include both a front and rear bag that are 7' in height, have sturdy side stiffeners and egg-crate foam inside the lid. A Prairie model seat bag is available to fit in front of the rear rack bag and on the back of the seat, adding even more storage. A tank bag is also available to fit over the tank in front of the driver. Additional space can be had with fender bags that fit in front of each fender.

Several years ago I went on an ATV adventure testing the Yamaha Kodiak on Kodiak Island, Alaska. It was a blacktail deer hunt with extended trips on the Island. My test ATV had a front **bag** with a **clear plastic map pocket** on the top. That **bag** made it extremely easy to follow the unmarked trails on our ride. A similar bag is available from Cabela's, and that bag is also weatherproof. In addition, Cabela's carries its Pro Series Saddle Bags that fit over the tank, as well as fender bags and a big utility rear rack bag that is contoured to fit over the rear ATV racks. The bag features three separate zippered compartments and a padded additional seat for resting on the trail. Kawasaki's Tank Bag also has a clear map case.

Bass Pro carries the M.A.D. Dog Gear Rack Bag, a huge cargo bag measuring 81"x12"x36", with all sides padded for extra protection and a zipper that extends around three sides. The bag also has eight D-rings to secure extra gear on top with hook-and-loop closures. Also from Bass Pro is the M.A.D. Dog Gear Cooler Rack Bag, a soft-sided, insulated, waterproof cooler with a capacity of 48 quarts. The Pro ATV bags from Bass Pro include two rear rack bags, including an oversized bag with five compartments and two water bottle holders.

Bass Pro also offers a number of Kolpin bags, including front/rear rack bags and the new Kolpin Sealtecor ATV Rainproof Luggage Bag, which has all seams electronically sealed. All walls are made of rigid, closed-cell foam with a fully lined interior and aluminum reinforcing

material.

One of the most unusual transportation systems is the MultiRack Platform, or MRP, that fits specific Arctic Cat ATVs. The MRP (r.) is available in a wide variety of combinations-including accessories for big game. Waterproof hard cases are available for both front and rear racks, such as this rear rack model from Piano (below).

Hard cases

ATV hard cases provide the ultimate in weather protection, and also protect delicate items such as cameras and binoculars. The ultimate in rear rack storage is the Cabela's rear rack ATV Storage Box constructed of weatherproof polyethylene with weatherproof stripping along the inside edges. The box also features a padded seat and back rest for resting during trail stops. The box is also available from Cycle Country. A front storage box with a fairing or windshield is also available from Cabela's. The windshield protects you from frigid air and snagging branches. The Cabela's ATV Dry Box fits on the rear rack, but also has a rear mounting bracket that allows the box to rest behind instead of on the rack, adding even more storage to the ATV.

Bass Pro carries the Kolpin Contoured cargo boxes for both front and rear ATV racks. The boxes feature weather-resistant gaskets to keep out the elements. The M.A.D. Dog Gear rear cargo box, available from Bass Pro, includes a rubber seal with a metal liner for watertight protection.

A number of accessories, including soft bags, are available by catalog or Internet. Shown are the M.A.D. Dog Gear Bags (l.) available from Bass Pro.

From Piano is the Rear-Mount ATV Box that has double-wall construction and a removable lid that opens from the front or back. A smaller, front-mount box is also available from Plano and it has a protective foam insert and a large lift-out tray. I frequently use it on my Prairie 650 to tote cameras.

If you're looking for "sturdy," the Bass Pro Black Tread ATV boxes are all-metal. Two sizes mount on either front or rear racks. Aluma Sport has both large and small powder-coated aluminum boxes, which are also available in Mossy Oak Break Up camouflage.

CDS carries both a Magnum Cajun Dri-Stor Dry Box and a smaller version. The magnum version is lockable. Both will fit on most front or rear ATV racks. The company also offers rear mount brackets that mount the units out, off the back of the rear rack.

Racks

Most ATV manufacturers offer a variety of rack extensions. They usually add height to the normally flat rack, allowing you to fasten more and bulkier items to the vehicle. Full metal racks, or more appropriately "baskets," are also available. Cabela's ATV Basket and Flat Racks are made of 14-ga. expanded metal, are available for both front and rear racks and are 6 1/4" Its Drop Basket Rack fits on the rear rack and the back portion extends out past the rear ATV rack and drops down below the rack, adding more storage space for bulky items such as coolers, fuel cans and tools. Another Cabela's Exclusive is the ATV Hitch Haul that fits into the hitch receiver of ATVs and also provides carrying space for coolers and other large items. The CDS Utility Rack pad provides a non-skid surface and is custom-fitted for any rack by using a utility knife.

Bass Pro has a large M.A.D. Dog Gear Back Basket made of rugged high-density polyethylene, as well as StrongBuilt expanded metal baskets for both front and rear. Its Universal Drop Basket Rack also fits on the rear rack and adds additional storage space for large items. Add the Bass Pro Haul It All for the receiver hitch and you can carry lots of gear, including tents and coolers. The ATV Totem and Treestand Buddy from Bass Pro make it easy to transport tree stands to the site. Its ATV Chain Saw Mount and Wing Pro Tool Mount are designed to tote tools to the woods as well. The CDS Chain Saw Mount easily and safely totes chain saws, while their Utility Tool rack can be used to carry shovels, rakes and gear for

such chores as prescribed burns for wildlife management.

Specialty racks, like this product from CDS (above), are available for toting items such as chain saws. Soft bags with a vinyl cover on the top, like this model from FieldLine (1.), are great for the display of pertinent materials.

Most of us have resorted to a messy combination of retention cords, tie-down straps and even milk crates to attach any number of items and gear to ATVs when heading to our hunting spots. Arctic Cat has just introduced an alternative to the strap-and-pray method it calls the MultiRack Platform or MRP. Using an open-channel, receiver-type design on the front and rear racks, hunters can easily affix many of the 20-plus accessory attachments to the MRP in a matter of seconds. The "slide-in" accessory attachments, many of which are designed for waterfowl and big-game hunting, are held securely in place with a simple pin. The result: maximized use of the 100- to 200-lb. load capacity of the front/rear racks, secured gear and a new level of usability.

Many manufacturers offer their own optional accessories. Shown are soft bags at and rack extensions on the Kawasaki Prairie 650.

For the waterfowler, a weatherproof cargo box provides easily accessed dry storage. Rack extensions with tall sides make it possible to haul two dozen decoys, and a cooler attachment also doubles as a carryall for shell containers. These are in addition to the gun rack/utility bar and a host of other box and basket-type attachments. Big game hunters can opt to a similar supply of useful attachments, including: gun scabbard; tool/gear lock (perfect for tree stands); water jug holder; expansion table and more. These accessories can be quickly removed for an after-the-hunt trail ride. The MultiRack Platform comes on the 2003 model year Arctic Cat 400 4X4 Automatic MRP and 500 4X4 Automatic MRP ATVs. MRP attachments are also available for fishing, farming, camping and construction.

Regardless of what you wish to rack, pack or sack, there's a product to fit your ATV.

ABSTRACT: Reviews of backpacks suitable for different outdoor activities.

TEXT:

Our resident expert picks the perfect backpack for everyone

Q

Dear Gear Girl: I'm heading off on a three-week trek around Thailand, from the hill-tribe region in the north to the islands in the south. What pack can hold shorts, rain gear and cans of insect repellent without weighing me down?

Gear Girl says: Multiday treks usually mean 35-pound loads--or more. So you should look for a bag with at least 3,800 cubic inches and a sturdy frame to help distribute the weight. THE NORTH FACE WOMEN'S STAMINA 65 (about 6 pounds, 15 ounces; \$279) has carbon fiber X-frame straps that can be adjusted to fit your torso length, interchangeable hip belts and shoulder straps to ensure a proper fit--plus 4,000 cubic inches of volume. It also has a **transparent map pocket**, a separate zippered sleeping **bag** compartment and a detachable daypack.

Bonus: A waterproof cover is tucked away in a pocket on the back panel. (800-719-6678, thenorthface.com)

Dear Gear Girl: I need a good daypack to take with me on the slopes--small enough so it won't get in the way but big enough to carry my board if I decide to go backcountry. Is there something out there that fits the bill?

Gear Girl says: The aptly named CLIVE SLIM (2 pounds; \$70) sports a sleek profile and a 475-cubic-inch volume that is spacious enough to store a few warm layers, snacks and a hydration reservoir without limiting your range of motion. Padded side pockets accommodate two-way radios, sunglasses and other fragile items. For those backside bowls that require hiking, the Slim has straps to carry a board vertically.

Bonus: A stowable hip belt is easily adjusted to fit varying torso lengths. (877-254-8396, clivebags.com)

Dear Gear Girl: I'm an avid shutterbug who's about to go on safari in Kenya. Give me a bag to take that can weather the trip--including sudden rain showers--and protect all my gear.

Gear Girl says: The LOWEPRO DRYZONE 200 (6 pounds, 15 ounces; \$329) is in such demand by serious outdoor photographers that the unit was back-ordered before it even hit store shelves in July. The first waterproof camera backpack with a soft shell, it can hold up to 50 pounds of gear and still float. Inner compartments can accommodate a pro video system or one SLR, four to five lenses, flash and accessories.

Bonus: Tuck-away tripod holder. (800-800-5693, lowepro.com)

Dear Gear Girl: I've been borrowing my boyfriend's pack when I travel but find that I'm either stooped over from the weight or getting chafed from badly placed straps. What can I do?

Gear Girl says: The answer to a sore back and shoulders is the MARMOT FEMME NIKITA (about 4 pounds, 6 ounces; \$179). With a frame of 17 inches, the pack has extra Brock foam padding in the hip belts and shoulder straps. The Femme Nikita, available in two sizes (2,900 and 3,100 cubic inches), was so smartly designed that Marmot decided to make a version for men.

Bonus: Hydration pocket and port, plus ski- and snowboard-carry system. (707-544-4590, marmot.com)

Dear Gear Girl: I like both boarding and skiing but I don't want to buy two packs. What pack can carry equipment for one sport or the other?

Gear Girl says: Inspired by its own best-selling Heli Pro pack, the DAKINE PRO II (4 pounds; \$90) comes with all the trappings of a technical backcountry ski bag, but it has a roomier, 1,458-cubic-inch capacity. Strap in your board horizontally or use the three-strap vertical carry system. The pack is also equipped with a floating shovel pocket and, when you want to ski, a stashable strap for carrying skis diagonally.

Bonus: A removable zippered hip pocket offers easy access to sunscreen, tools and other small essentials. (dakine.com)

Dear Gear Girl: When I go blading, I need a pack that's big enough for street shoes but won't get in the way when I need to negotiate crowds. What have you got?

Gear Girl says: Designed for lightweight loads, the 1,160-cubic-inch GRAVIS SPLINTER (1 pound, 5.5 ounces; \$60) has a teardrop profile that makes it ideal for cruising through tight spots. Electric-green organizational pockets (with Velcro and zipper closures) line the inside back panel, and two outside pockets provide just enough room for stowing small items like sunglasses and cell phones.

Bonus: Cinchable bungee cords for stashing a warm layer on the go. (800-223-7450; gravisfootwear.com)

Dear Gear Girl: I've signed up for a winter-adventure trip in Montana, and the activities include snowshoeing and ice climbing. Can you recommend a good daypack?

Gear Girl says: Bulky winter gloves can make the smallest task a chore.

So if there's one thing cold-weather enthusiasts value in a pack, it's easy access. That is what sets the ARC'TERYX RT35 ROLLTOP (about 3.4 pounds; \$149) apart. Instead of having to flip back a lid and wrestle with clips and drawstrings, simply roll open the drybag-style enclosure. Thermomoulded hip belts provide superior comfort, and the body-hugging Y-frame offers support without lots of padding to slow you down.

Bonus: Removable rope carrier and watertight kangaroo pocket. (800-985-6681; arcteryx.com)

Dear Gear Girl: I'm going fly-fishing in Wyoming for a week.

Is there a waterproof pack that is more than just a rubber sack?

Gear Girl says: The PATAGONIA STORMFRONT (1 pound, 13 ounces; \$175) has an innovative two-part system. The waterproof polyurethane-laminated "pod" (a watertight zippered enclosure that completely seals out moisture with "sealing lips" above and below the closed zipper) can be used alone as a drybag or snapped into a backpacklike harness for easy transport. Its 1,680-cubic-inch capacity is perfect for day trips on the river.

Bonus: Hydration system compatible. (800-638-6464; patagonia.com)
